

SC22-3 Safety Controller

Multifunctional Controller Streamlines Safety Circuit Design

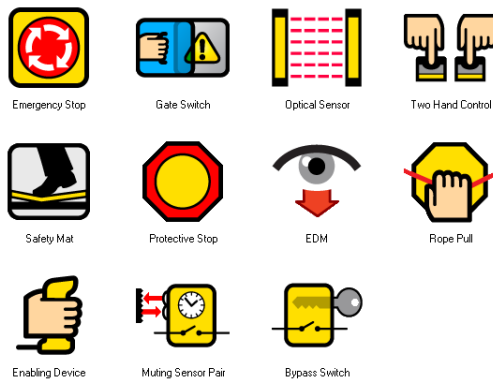

- Fully Configurable Monitoring of a Wide Variety of Devices Such as Light Curtains, Mats and E-stops
- 22 Inputs, 3 Dual Channel Safety Outputs and 10 Auxiliary Outputs
- Advanced Functions Include Muting and Timing
- Intuitive PC Interface or Push Button Programming
- Configuration Files Easily Stored and Transferred
- Reduces the Number of Wiring Points and Improves Diagnostics When Compared to Multiple Safety Relay Module Integration
- Hookup and Ladder Logic Diagrams Automatically Created for Machine Documentation Purposes
- For More Information, Free Demo, and PC Software: www.bannerengineering.com/SC22DEMO

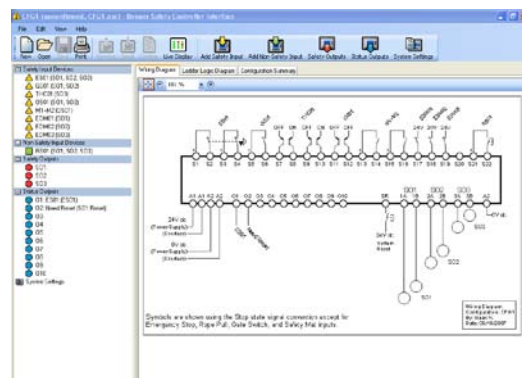

Flexible Safeguard Monitoring

Complete Application Status

Simple Software Setup

Documented Configurations
